

Tax & Retirement Planning Guide

At TD Asset Management Inc. (TDAM), we understand the importance of tax planning to investors. There are many tax-efficient investment vehicles available to Canadians to help maximize after-tax income and grow their investment portfolios. For example, you may consider using a Registered Retirement Savings Plan (RRSP) or Tax-Free Savings Account (TFSA) to save for retirement or a Registered Education Savings Plan (RESP) for a child's education. You may also want to take advantage of appropriate deductions and government sponsored benefits. In addition, consider whether it is advantageous to hold investments that earn relatively tax-efficient income, such as Canadian dividends or capital gains.

TDAM has created this guide to help outline some tax planning information. While the guide is useful, we encourage investors to seek qualified tax planning advice to develop a strategy that's appropriate for their unique situation.

Tax-Free Savings Account (TFSA)¹

The key features are:

- Starting in 2009, Canadian residents aged 18 and older could contribute into a TFSA.
- Contributions to a TFSA are not deductible for income tax purposes, but investment income, including interest, dividends and capital gains earned in a TFSA are not taxed.
- Unused TFSA contribution room can be carried forward to future years.
- You can withdraw funds from the TFSA at any time for any purpose.²
- You cannot contribute more than your TFSA contribution room in a given year, even if you made withdrawals during that year. However, amounts withdrawn in one year are added to your TFSA contribution room in the following calendar year.
- If, at any time in a month, you have an excess TFSA amount (which is, generally, an over-contribution to your TFSA), you are liable for a tax of 1% on the highest excess TFSA amount in that month.
